The first Troy Directory was published in 1829. Of the 2,080 persons whose names it contained, there were published in the Directory of 1869, forty years later, the names of eighty-six then living and continued in that volume, and forty then known to be living out of the city. From the record of these names kept by Mr. William H. Young, it is of interest to notice that the following names continue in this sixtieth volume of the Troy Directory :

William Barton, David Bristol, George Sims.

The following were at last accounts living in other places:

Samuel H. Tupper, Brooklyn; Zephaniah Clark, Albion, N. Y.; John R. Kimberly, Michigan; Isaac J. Merritt, New York; Thaddeus W. Patchin, Washington, D. C.

The following have died since our last record made in the Directory of 1886:

Thaddeus B. Bigelow, at Oakland, Cal., June 3, 1888, upon his 89th birthday. Jefferson Gardner, at Lansingburgh, June 2, 1888. Abijah Holcomb, at Green Island, May 27, 1888, (since his name was taken for this volume). Philip T. Heartt, of New Jersey, Oct. 13, 1887. William Perkins of Troy, April 8, 1888. Amos S. Perry, of Brooklyn, Jan. 9, 1888. Luther B. Wyman, of Brooklyn.

TROY STREET DIRECTORY.

Giving the name of each street, and showing what other streets and places run from it or across it with the number at which they intersect.

From the list, the location of any number on a street can be easily ascertained; as, for instance, wishing to know at what part of Second street No. 168 comes, look at Second street on page 14 and find that Liberty street crosses at 156, and Washington street at 178, showing that 168 Second street would come half way between Liberty and Washington streets.

SESSIONS.

The School year is forty weeks or four quarters of ten weeks each. Commencing with the third Wednesday in September, closing with the last Wednesday in June. The only vacation is during the Christmas holidays.

The success which has attended the efforts of the trustees of the Seminary to maintain a day school of the first-class in Troy is assured. The patronage of our citizens is generous, and the scholarship and progress of the pupils satisfactory.

The Institution has recently been more completely equipped for instruction in the physical sciences; and classes in primary branches have been arranged, which offer unusual advantages for young children.

It is confidently asserted that pupils residing at their own homes in Troy, have at the Seminary, means of advanced education equalled by only a few of the best boarding schools and colleges for young ladies in the country.

The School thus affords to the citizens of Troy unexcelled facilities for the thorough and economical education of their daughters, while surrounded by home influence and parental care.

An investigation of the merits of the school is respectfully invited.

This Company owns the entire water power of the Mohawk River at Cohoes, embracing the celebrated Cohoes Falls. Aggregate fall, one hundred and twenty feet, giving nearly ten thousand horse power. The Company's gate-house and dam are among the finest structures of the kind in the United States.

The canals are so constructed as to give a succession of falls from one canal to another, varying in height from twelve to twenty-five feet. The power is leased by the Company, with land for factory building, in perpetuity, at an annual rental of about twenty dollars per horse-power, and considering the quality, is the cheapest in the country. It is an unfailing power; and during the past few years, while most of the water powers in the country have failed for a time, Cohoes has had an abundant supply, without one minute's stoppage. About one-third of this magnificent power is unappropriated, and appurtenant thereto are some of the finest factory sites to be found anywhere.

Cohoes is situated at the confluence of the Mohawk and Hudson Rivers, about four miles from Troy and ten from Albany, and is eligibly located with reference to New York and other markets, and possesses superior advantages for transportation to market, either by river, canal or railroad, having two canals and two railroads running through it. It is a thriving young city of nearly twenty thousand inhabitants, and contains some of the finest cotton and other factories in the United States.

1843 JANUARY 1, 1888. 1888

The Mutual Life Insurance Company

OF NEW YORK.

RICHARD A. McCURDY, President.

Assets, $118,806,851.88. Liabilities, $112,512,410.36.

Surplus, $6,294,441.52.

Offers its Distribution Policy as the most desirable form of Life Insurance contract ever presented. Its features are as follows:

1.—After two years this Policy places no restrictions upon the insured in respect to Residence, Travel or Occupation.

2.—Danger of forfeiture is avoided by the agreement, on the part of the Company, after the Policy has been in force three years, to give such an amount of paid-up insurance as will be purchased by the entire interest of the Policy-holder in the accumulations of the Company.

3.—Dividends will be credited to the Policy at selected periods, which dividends can be drawn in cash if desired.

4.—The Policy contract is in the simplest form. If the insured pays his premium while he lives, the Company will pay his Policy when he dies.

5.—A definite and liberal cash surrender value is guaranteed, for which the Policy can be canceled.

6.—A Policy which becomes a claim by death will be paid as soon as proofs are accepted.

Policies are issued having Distribution Periods of Fifteen or Twenty Years, as the applicant may elect. At such times the insured has the right to surrender his Policy to the Company and receive therefor in cash his entire interest in the funds of the Company, together with the dividends which have accrued. The cash surrender value of the Policy is guaranteed in the terms thereof.

The options which are presented to the insured at the end of any distribution period are as follows: he may

Surrender Policy and Dividends for Cash; or,
Surrender Policy for a Paid-up Policy, and draw Dividends in Cash; or,
Surrender Policy and Dividends for a Paid-up Policy; or,
Continue Policy and use Dividends in reduction of future Premium; or,
Continue Policy (at original rate) and draw Dividends in Cash; or,
Continue Policy (at original rate) and let Dividends increase Policy; or,
Continue Policy (at original rate) and use Dividends to Purchase an Annuity.

☞ A Paid-up Policy is guaranteed at any time after the third annual premium is paid, in accordance with the laws of the State of New York.

FREAR'S
TROY BAZAAR

Has steadily increased in size and volume of business since its commencement, and to hold its position at the head of the line, Mr. Frear has made extra preparations for a large increase in trade during the year of 1888. Patient research through all the greatest markets of Europe and America for the newest artistic fabrics and novelties, has for its result the most comprehensive accumulation of Dry Goods, etc., ever exhibited in Troy or vicinity. The Troy Bazaar shows

A STOCK OF DRY GOODS WORTH

OVER $500,000,

ACTUAL CASH VALUE.

It is patent to all thinking people that Wm. H. Frear, buying in such immense quantities, and always from the producer, can afford to sell goods at prices that defy competition. The Troy Cash Bazaar with its gigantic array of rich and elaborate goods, affords its patrons the greatest facilities to give play to their tastes in selecting articles of apparel, for the toilet, or for the decorating of their houses. A careful showing of goods will be given in all departments, and Mr. Frear's motto, "Perfect satisfaction guaranteed or money cheerfully refunded," is still in active force.

TOOLS.

The above cut is a fac-simile of the machine manufactured by T. C. HARRIS & CO., 19 Federal St., Troy, N. Y., of which the following is a description: The shaft is made of steel in sizes from one inch to two and one-half inches, light shaft for polishing and heavy shaft to carry 18 inch emery wheels if required. The above cut represents a 1¼ inch shaft between flanges for heavy wheels. The tight pulley and inside flanges are shrunk on shaft, therefore causing uniform density of metal, which prevents the shaft from being thrown out of balance when revolving at a high rate of speed, as is the case when set-screws or keys are used. The shaft is mounted on a strong, substantial frame, the boxes of which has a ¼ inch of babbitt metal of the best quality, and inclosed in the outer box is an oil chamber, as may be seen by the removed cap and inside half of box. The outside boxes are planed so as to make a tight joint when together, the adjustment being done by set-screws tapped through top cap. There is no packing strips between the boxes. When adjustment is required loosen the check nut on set screw. turn screw down until lost motion is taken up—which is ascertained by turning shaft with one hand during the operation; then check the nut and the machine is ready for use. This is the Safest, Quickest and Most Perfect Adjustment in use for this class of bearings.

The above machine weighs 225 lbs., and can be set any desired height from the floor.

All work intrusted to our care will be guaranteed satisfactory. We respectfully solicit your patronage for anything in our line.

A LARGE ASSORTMENT OF BEST PATTERNS from which to select, to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person, two inches below the top of the hip bones. If the rupture is at the navel, the measure should be around the body at the navel.

"**1503.** CODMAN & SHURTLEFF, Boston, Mass. One Case Surgical Instruments and Atomizers. The Committee have no hesitation in awarding for this superb exhibition the highest premium. * * * The various other instruments for inhalation of atomized liquids, and for Local Anæsthesia, were all apparently faultless, both in design and workmanship. The exhibitors are regarded as more especially deserving of the highest token of merit for having produced nothing except their own manufacture.
